

Bricks 4 Kidz classes provide an extraordinary atmosphere for children, where we learn, we build, we play... with LEGO® bricks. Programs are built around our proprietary model plans, designed by engineers and architects, with exciting themes such as space, construction, and amusement parks. Our specially designed project kits and theme-based models provide the building blocks for the Bricks 4 Kidz approach to educational play. At Bricks 4 Kidz, we believe that kids learn best through activities that engage their curiosity and creativity.

TGA Premier Junior Golf is a youth development program for PK-8th grade students. TGA conducts a five level after school golf enrichment program that takes place primarily at elementary schools and youth centers across the U.S. TGA's curriculum was created by golf professionals and education experts to include lesson plans that are fun, safe and educational. TGA's program can be conducted indoors or out, on concrete or grass, year-round by utilizing fields, blacktops, gyms and even hallways. As students matriculate through the five level program, TGA provides opportunities for them to apply the skills they're learning at their schools to the golf course through transition programs such as TGA camps, tournaments and clinics at partner golf facilities.

## After Care Enrichment Services

# About the Programs We Offer

During after-school programs, children engage in exciting hands-on activities, watch spectacular demonstrations, participate in inquiry-based discussions and take home projects that they have made themselves like model rockets, periscopes, Mad Science putty, and more! Our hands-on, one-hour science programs are themed around a particular area of science and include such topics as electricity, magnetism, optics, biology and many more.

The creative process often involves experimentation and taking a risk. The KidzArt experience supports this discovery process in a non-competitive environment where mistakes are OK. Relaxing exercises and soft music allow students to focus, try something new and enjoy what they are doing. We offer visual and perceptual tools that are easy to learn and make problem solving an exciting, fun, transforming experience!

*Abra-Kid-Abra*

At Abra-Kid-Abra we perform and teach magic and related variety arts—circus, comedy, balloon art, and puppets. Our mission is bringing out the STAR in kids! We structure our comedy magic shows so the kids who assist us feel proud and shine as the stars. When children learn magic, they develop presentation skills and confidence—valuable life skills.

## What Make A.C.E.S Right for Your school?

After Care Enrichment Services, or A.C.E.S, is a service that provides schools with premium after-school programs in St. Louis right in one place. This opportunity enables students to participate in quality and proven programs without any involvement from the school faculty and staff.

## The Benefits of Our Program

A.C.E.S is a completely turnkey enrichment program which offers multiple program choices and more to come in the future!

A dedicated A.C.E.S On-site Coordinator is present 30 minutes before and after program sessions and assists where needed.

No cost to the school.

Background checks are performed on all employees.

All programs meet state and national academic standards.
