After School Classes 2016-2017

Our classes this year have 3 goals:

- 1) Develop presentation skills & confidence.
- 2) For math magic, meet Common Core State Standards in math.
- 3) Have fun!

Magic to Amaze Family, Friends & Pets!

- · Poke a hole in your shirt, then instantly restore it!
- Vanish a card right out of someone's hands!
- Divine which envelope holds the money!

Abra-Kid-Abra's brand new class will teach magic your child can perform in the cafeteria, at the dinner table, or when out with family or friends! Your child will be the life of the party! In addition to the nightly show you're likely to enjoy, students will star in a family show the last day. Goals are to develop presentation skills, build confidence, and have fun! K-5.

Circus Arts -- Tossing and Balancing!

Bally Hoo! Welcome to the big top! Have you ever wanted to run away with the circus? This is your chance! You'll learn stilt-walking, plate spinning, rolla bolla, 2-person ring juggling, and more! The class is very hands on, and supports the President's Challenge to get more physical activity into kids' daily routines. Class culminates with the students putting on a circus for their families! Goals are to develop presentation skills, build confidence, and to enjoy being physically active. Several new elements will be introduced from last year's circus class.

ADDra-Kid-Abra

- Mind read the number a spectator is thinking of!
- Instantly add a colum of 4-digit numbers!
- Make balls travel mysteriously from 1 hand to another!

Learn these tricks and more in our new math magic class! Students get their own magic case and new props to put in it each class. You may well get a nightly show! The tricks are math-based. So while students develop their presentation skills as they enjoy learning magic, they are also sharpening skills in addition, subtraction, measurement, counting, even-odd, and geometric shapes. Class concludes with students putting on a math magic show for their families.
