

Capturing Great Memories at Your Party

Great Moments to Photograph

1. Before the party
Take photos of your cake and any decorations. Include the birthday child & family members if available.
2. Before the Magic Show
 1. Ask the magician what tricks he'll call your child up for & when in the show they'll be, so you can be ready.
 2. If the birthday child has a sibling or relative you'd like to be a helper, let the magician know so you can photograph them assisting as well.
3. During the Show
 1. Photos of the kids, especially when they are laughing or interacting.
 2. If you are doing the illusion package, the 3 illusions with your child make great photos:
 1. Your child magically appearing from a big box to open the show.
 2. Giant wands routine - when your child waves the 4' and (especially) the 6' long wand, which is bigger than he/she is!
 3. Suspension trick at the end where your child floats in mid air! (Feel free to add these to your package if you wish.)
4. Cake Time Photos
 1. The cake, before it is cut makes a great photo. Especially in front of your child.
 2. Your child blowing out the candles.
 3. Kids with cake all over their faces!

Photo Tips

- Charge your camera the night before.
- Clear out the memory card so you have room for photos and/or videos.
- Consider asking someone to take photos so you can enjoy your party. E.g. a relative, teenager, parent, baby sitter, spouse,...
- Take close-ups as well as far away shots.
- Getting down at eye level with the kids often yields great pictures.
