Bringing out the **STAR** in kids!

3 goals for our classes:

- 1) Develop presentation skills & confidence.
- 2) For math magic, meet Common Core State Standards in math.
- 3) Have fun!

## Making Things Appear & Disappear!

- Color a booklet by magic!
- Make a coin someone is holding *disappear*!
- Pull a rope right through your body!

These are just a few of the tricks your child will learn in Abra-Kid-Abra's new after school magic class! You'll get your own magic box and new tricks to perform each week! Participate in a family show the last class! Goals are to develop presentation skills and build confidence. Tricks are new from previous camps and classes.

## Kids Comedy

Do you like to chuckle? Do you enjoy making others laugh? This class is designed to bring out the sense of humor within you---while having a blast in the process! You'll learn hilarious skits and jokes, how to deliver them, and what makes something funny. You'll experience theater games, and you'll take home a new gag each week—such as silly glasses, squirting cameras, snapping gum, and many more! Class culminates with students putting on a family comedy show. Goals are to develop public speaking skills, comedic creativity, and to have a lot of laughs!

## Mathemagic!

- Produce a \$1 million bill!
- Cause an object to move *by itself* in a spectator's hand!
- Mind read numbers a spectator randomly calculates!

The tricks are math-based. So not only will you learn astounding magic, but you'll hone your math skills as well! You get your own corrugated magic case out of which you can perform, and new tricks to put in it weekly. Participate in a family show the final class. If you want to learn magic, if you like math, or if you want to improve your math in a fun way, this class is for you! Tricks are all new from the last 3 years.
